TRAINING & EDUCATION PLATFORM  
FOR  
SELF-DIRECTED TRADERS

**Did you know  
you can now  
trade without  
using your own  
capital?**

Reputed prop trading firms are now offering traders worldwide access to their capital to trade futures, forex, and crypto on global platforms. Firms like MyFundedFutures, Apex Trader Funding, Take Profit Trader, Tradify, and several other well-known names provide funding from as little as \$1,000 to as much as \$1 million.

If you can trade within their risk-managed rules, you get the opportunity to trade significant capital without risking your own money. And when you profit, you keep up to 80% of those profits.

Did you know that traders across India and globally are consistently earning thousands of dollars every month from prop firms—without putting their personal capital at risk? This is the future of trading.

Prop Firm Match

**The Leading Prop Firm  
Comparison Platform**

**[www.propfirmmatch.com](http://www.propfirmmatch.com)**

## **PropFirmMatch.com – A Career Catalyst for Prop Traders Worldwide**

PropFirmMatch.com is not just another comparison site; it's a career launchpad for prop traders across the globe. Whether you're an aspiring trader stepping into the world of funded accounts or an experienced professional seeking your next big opportunity, Prop Firm Match is designed to support every stage of your trading journey. At its core, PropFirmMatch.com serves as an industry hub—bringing together the most comprehensive, verified, and up-to-date information about leading proprietary trading firms worldwide.

Traders can explore:

- **Detailed Firm Profiles:** All essential details about top prop firms—funding models, rules, payout structures, trading platforms, and evaluation processes—consolidated on a single, easy-to-navigate platform.
- **Verified Trader Reviews:** Genuine insights from real traders help visitors make confident decisions, without the noise of fake or biased reviews.

- **Global Referral Hub:** Acting as a referral point, PropFirmMatch.com connects traders directly to leading firms, offering exclusive challenge discounts and sign-up benefits—saving money while unlocking opportunities.
- **State-of-the-Art Comparison Tools:** Evaluate firms side-by-side, understand nuanced differences, and choose firms that match your trading style and goals.
- **Continuous Career Support:** With regular updates, industry news, expert reviews, and educational content, traders stay informed and empowered long after joining a firm.

In essence, PropFirmMatch.com is more than a directory—it's your trading career partner. It simplifies discovery, enhances decision-making, and opens doors to global opportunities with top-tier prop firms. Whether you're looking for your first funded account or scaling up to manage higher capital, this platform serves as your trusted guide and referral point on the path to becoming a successful prop trader.

Now that you've chosen not to risk your own capital and will be trading with prop firm funding, you're essentially operating with access to unlimited capital.

**The next step is to define your approach:**

How will you pass the evaluation, secure a funded account, and trade consistently to generate profits and take payouts almost daily?

"Practice is the path.  
Discipline is the result.  
Profit is the outcome.  
In trading, consistency  
comes to those who  
train for it."

## **Profits Through Relentless Practice — Our Only Approach**

We are not an online trading course, a podcast channel, or a social media guru promising profits with shortcuts or hype. We are the only trading education platform built on one non-negotiable principle: Relentless Practice in a Grade-A Training Environment.

Our mission is clear — to create disciplined, profitable traders through real-time, real-world, hands-on training. We don't just talk about discipline, risk management, or consistency — we practice it every single day, offline, with you. We don't teach theory for the sake of it. We don't rely on lectures, recordings, or simulations. We coach live. We correct live. We build you up by grinding through actual trading scenarios — again and again, until discipline becomes your nature and profits become your outcome.

### **What sets us apart?**

- Practice-first approach: Every concept is drilled into live market environments.
- Accountability-driven coaching: We don't leave you to figure it out; we walk the journey with you.
- Environment matters: You learn in a Grade-A ecosystem built for performance and growth.
- No theory-only nonsense: We believe in muscle memory, not memory-based strategies.
- 100% Fee-Back Guarantee: If you don't earn at least your fee back in 4 months through practice, we refund you. No questions asked.

Our promise is simple. If you give us your dedication and time, you will walk out not just as a trader — but as a professional risk manager and a consistent, profitable performer.  
This isn't a course.

**This is practice. Only practice.  
And that's why it works.**

**No hype. No shortcuts. Just skill, structure, and integrity.**

We are not like those so-called trading gurus or flashy Instagram ads selling ninety-nine rupee webinars or three-month crash courses promising you will become profitable overnight. The truth is, most of them are just trainees themselves — coached by marketers who teach them how to sell dreams, not deliver results. These creators often have no real-time trading accountability and certainly no responsibility once the course is over.

Can they train you in a real-world trading environment, day after day, correcting you, supervising you, and pushing you toward discipline and performance?

**We both know the answer.**

At TheFloor, we believe only disciplined, structured, risk-managed trading can make someone a professional. That's why we don't just "teach." We train you through repetition, daily execution, and feedback in a real-time market simulator that mimics actual funded accounts. You don't just sit through theory — you trade. You don't just learn strategies — you build habits. All of this happens in a focused physical workspace designed to improve your mindset, with real infrastructure, mentorship, and capital support. This is the environment where professionalism is built, and professionalism always leads to profitability.

Most coaches won't take responsibility for their systems.

**We do**

**If our training does not help you earn at least the money you invested by the end of four months, we refund your full fee without questions.** That's because we are not here to sell an online course — we are here to build real traders. This is not marketing. This is commitment. We provide everything under one roof — practice, mentorship, infrastructure, and capital — to ensure your success, not our sales.

# Welcome to the New Era of Trading

You don't need capital to become a profitable trader anymore. You need skill, system and the right platform.

Welcome to TheFloor — where everyday individuals build real trading businesses, backed by international funding and disciplined coaching.

In today's world, access to financial markets is no longer a luxury. But making consistent profits from those markets? That still remains a challenge for most.

**Thousands of traders burn through savings, jump from YouTube strategy to Telegram signals, and end up discouraged, confused, or worse — in debt.**

That's where TheFloor steps in.

We are not a course.

We are not a strategy.

We are a full trading business ecosystem — built for serious individuals who want to make trading their profession, not their gamble.

At TheFloor, we help you train in real market environments, using simulated funded accounts from some of the world's best prop firms like Apex Trader Funding, FFN, and My Funded Futures. You're given capital to prove your consistency. When you meet the benchmarks, you're paid real profits — with zero risk to your own money.

We've developed a **practice-based, supervised training system rooted in what works — not theory, not hype.** Inspired by trading legends like Mark Douglas and Richard Dennis, our approach is simple: Train until you become funded. Stay funded until you scale.

This is the opportunity most Indian traders never knew existed.

This is TheFloor. And this is your chance to build something real.

"We don't predict markets. We prepare traders."

# Who is a Funded Trader?

A funded trader is someone who trades with someone else's capital – not their own – and keeps a share of the profits.

In the past, becoming a full-time trader required you to risk your own money. That meant years of savings, endless anxiety, and often, painful losses. But today, thanks to proprietary trading firms (prop firms), that's no longer the case.

Here's how it works:

## **The Model:**

1. You apply to a prop firm like Apex Trader Funding or FFN through our platform.
2. You are given access to a simulated account with real market data (₹40L to ₹80L equivalent in capital).
3. Your job: trade with discipline, follow risk rules, and meet a profit target.
4. If you succeed, the firm funds your trading account and pays you a share of the profits – up to 90% – every month.

## **Why Do Prop Firms Do This?**

Prop firms are always looking for skilled, disciplined traders. Instead of hiring people on Wall Street, they now fund remote traders across the world who can prove consistency.

You don't need credentials.

You don't need capital.

You only need consistency and the right setup – and that's exactly what TheFloor provides.

## **Funded Trading Is Not Gambling.**

It's not about placing bets. Funded traders follow a rule-based system, manage risk, and treat it like a real business.

"In the funded world, you're not judged by how much you can risk. You're judged by how well you protect capital."

The funded trader model opens the door for everyday people – from students and housewives to corporate professionals and retired employees – to generate income by practicing structured trading.

This is the future of trading.

And it's now within your reach.

# The Evolution of Prop Trading

From Wall Street Floors to Your Laptop in India  
Prop trading — short for proprietary trading — was once a secretive world, limited to elite firms and traders sitting inside glass buildings in London or New York.

They traded the company's capital, not their own. If they made profits, they got bonuses. If they lost, the company took the hit.

But everything changed in the last 10 years.

## **The Old Model (Pre-2010s):**

Only Ivy League graduates and insiders were allowed to become prop traders.

All trading was done from offices using advanced tools.

Entry barriers: High education, location, networking, and capital.

## **The New Model (Post-2020):**

The rise of remote technology, market data simulators, and cloud-based platforms allowed prop firms to recruit talent from anywhere.

Prop firms like Apex Trader Funding, FFN, and My Funded Futures began offering simulated accounts to test traders online.

If you perform well in a demo environment, you get funded with real capital – no office, no degrees, no risk.

## **Why This Works Today:**

Win-Win Model: You earn profits, and the firm earns a percentage of your performance.

Scalable: You can grow from \$50K to \$1 Million + in funded capital.

Low-Risk Entry: All you need is a refundable setup fee, trading rules, and the discipline to follow them.

Technology Makes It Possible: Live data, fast execution, performance dashboards – all accessible from your home.

“Prop trading isn’t about predicting the market. It’s about following a plan better than 95% of retail traders.”

## **Why Indian Traders Should Care**

For the first time ever, geography doesn’t matter. Whether you live in Bangalore or Bareilly, you can get funded by a US-based prop firm – if you follow the rules.

This is the biggest shift in financial opportunity in a generation.

And you’re just in time to ride the wave.

# Why Indian Traders Miss Out

The World Changed. Most Indian Traders Didn't Know.  
For decades, Indian traders have operated in isolation — limited by capital, exposed to scams, and misled by noise. While the rest of the world was transitioning to funded trading, most in India remained stuck in outdated models.

The Core Problem Isn't Talent. It's Awareness.  
Most aspiring traders in India don't even know prop firms exist.

They believe trading means:

Opening a Demat account,  
Trading with their savings,  
Watching YouTube tips,  
And hoping for luck.

Meanwhile, global traders are being funded with \$50K to \$1 Million +, earning monthly payouts — without risking their own money.

## Barriers That Kept Indian Traders Out:

- ✗ No exposure to prop firm opportunities
- ✗ Lack of English-friendly resources
- ✗ Scams disguised as “free signals” or “advisory services”
- ✗ High capital expectations from traditional brokers
- ✗ No clear roadmap to build skills and scale

This led to frustration, inconsistency, and burnout — not because Indians lacked skill, but because they lacked the right ecosystem.

**But Things Are Changing — Fast.**  
**In the last 2 years, a growing wave of Indian traders have discovered the funded trading model.**

## **They’ve realized:**

You don’t need capital — you need consistency.  
You don’t need to guess — you need structure.  
You don’t need to lose — you need the right support.

“The opportunity always existed. We just didn’t know where to look.”

✚ TheFloor is closing this gap by giving Indian traders access to:  
Funded simulated accounts from top global prop firms.

A structured, supervised environment to practice  
Refundable business setup models that work  
Now, the door is open.

It’s no longer about where you’re from — but what you’re willing to learn and execute.

# Success Stories from the West

From \$0 Capital to Million-Dollar Withdrawals  
What happens when disciplined trading meets the  
right platform?

Life-changing results.

The West has already seen it – and now it's time we  
catch up.

Jade Capital – \$2.5 Million in 60 Days (Apex Trader  
Funding)

Jade Cap, a team of traders in the U.S., became a  
legend in the prop trading world after withdrawing  
\$2.5 million in just 60 days from Apex Trader Funding.

Using multiple funded accounts, strict trade  
management, and an unwavering focus on high R:R  
setups, they scaled their operation from \$50K  
accounts to seven-figure payouts.

"We didn't gamble. We executed our edge. Every day,  
without fail."

This is proof: with the right system, prop firms don't limit your upside – they amplify it.

**Patrick Weiland – The Consistency King**

A day trader and educator, Patrick has publicly documented consistent 5-figure monthly payouts from prop firms.

He specializes in small wins, fast exits, and compound consistency.

Patrick shows that success isn't just about a big strategy – it's about being professional, treating trading like a business, and sticking to rules.

"Treat the market like a casino, and you'll go broke. Treat it like a job, and you'll get paid."

**Plenty of Other Notable Names in the Funded Space**

- Trader TBM (Matt) – Over \$200K in Apex payouts in less than 4 months.
- Investing Sensei (YouTube) – Grew from demo accounts to live withdrawals from multiple prop firms.
- Top One Percenter Community (US-based) – Hundreds of traders sharing real Apex, FFN, and TFT payouts weekly.

### **What They All Have in Common:**

- ✓ Zero personal capital risked
  - ✓ Simple systems, traded with discipline
  - ✓ Full use of simulated accounts until funded
  - ✓ Withdrawal-focused, not fantasy-focused
  - ✓ They practiced until payouts became predictable
- "They aren't lucky. They are just a few years ahead. And now, so can we be."

# The \$10 Billion Prop Trading Revolution

**The World's Smartest Traders No Longer Trade Their Own Money**

The prop trading industry has quietly exploded into a \$10+ billion global movement, with thousands of traders earning real payouts every month – all without risking their own capital.

And yet, most of the world still doesn't understand how big this is.

## **What Is Driving This Revolution?**

**Technology:** Live data, charting platforms, and AI-driven analytics have enabled remote traders to match the performance of Wall Street professionals.

**Liquidity:** Global financial markets offer 24x5 opportunity, especially in futures and forex.

**New Prop Firm Models:** Firms like Apex Trader Funding, FTMO, Take Profit Trader, My Funded Futures, and others have moved online – giving anyone, anywhere, a shot at trading firm capital.  
“Prop firms are no longer hidden behind office doors – they live on the cloud.”

### **The Numbers Speak Loudly:**

Over \$1 Billion in payouts have been distributed by prop firms in the last 2 years alone.

More than 1 million traders across the world have attempted a funded challenge.

Over 70% of funded traders are self-taught, using platforms like YouTube, Discord, and now – supervised ecosystems like TheFloor.

The global prop trading industry is growing at 25% YoY, driven by retail participation and institutional diversification.

### **Relevance to Indian Traders**

While countries like the U.S., Canada, and UK dominate current participation, India is just beginning to tap into this movement.

India has the largest pool of undercapitalized but skilled traders.

With access to funded programs, Indian traders can trade global markets, earn in dollars, and scale professionally – all from home.

“The next generation of professional traders won’t be from Wall Street. They’ll be from WhatsApp groups, trading floors like ours, and living rooms across India.”

The revolution has already begun. The only question is – will you be part of it?

**thefloor**

**Introducing TheFloor**

At TheFloor, our training isn't built on hype, personal track records, or any single trader's success story. It's built on collective wisdom—the tested and proven experiences of hundreds of traders, mentors, and funded professionals from around the world.

We've taken what works.  
We've removed what doesn't.  
And we've simplified it into a repeatable, structured process that anyone can follow.

Our approach is rooted in decades of market learning:

**Mark Douglas's** mental mastery — the simplicity of treating trading as probabilities and practicing emotional discipline

**Richard Dennis's** belief — that anyone can become a trader if they follow a defined system

**Oliver Velez's** strategies — focusing on clean, repeatable setups using just moving averages and price action

**Funded traders' insights** — real-world techniques from traders who've passed evaluations and consistently withdrawn profits

This isn't a random strategy or theory-driven course. It's a system—a living, breathing framework shaped by:

- ✓ Funded trader success stories
- ✓ Mistakes made and corrected over time
- ✓ Simple tools that work in real markets
- ✓ A clear path to discipline, execution, and profitability

Our role as a platform is not to overwhelm you.

Our role is to supervise, guide, and keep you accountable—to ensure you follow the system that already works, instead of reinventing the wheel.

The result?

A program that doesn't just teach trading.

It builds traders.

Structured. Proven. Reliable.

# Your Trading Business in a Box

Everything You Need to Become a Funded,  
Consistently Profitable Trader

Most people think trading is a hobby — a side hustle.  
At TheFloor, we treat it like a profession. Like a  
business.

We don't just teach you trading strategies.  
We give you the full structure, tools, systems, and  
hands-on training to build a reliable, scalable  
trading business — just like professionals working  
with proprietary firms do with the most minimalistic  
approach

## **What's Inside the Box?**

### **1. Real-World Practice Environment**

You'll train in a high-performance simulator that mirrors actual market conditions — including all the pressure, structure, and expectations that come with real funding challenges.

### **2. Proven Trading Strategy**

You'll learn battle-tested price action setups — including Elephant Candles, Hammers, Color Change Zones, and more. No indicators. No clutter. Just clean, powerful systems.

### **3. Risk Management System**

Learn how to think like a professional: control your losses, protect your capital, and develop habits that make your strategy scalable and sustainable.

### **4. Supervisor-Led Guidance**

Our expert team tracks your trades, reviews your decisions, and helps correct behavioral mistakes. This is mentorship — not just content.

### **5. Structured Daily Routine & Scorecard**

We help you build a disciplined daily routine, use a personal trading scorecard, and reflect on your actions — just like any top-performing business.

### **6. Support for Prop Firm Challenges**

We train you to pass funded challenges from top global firms like Apex, FFN, and My Funded Futures — and show you how to stay funded consistently.

"Don't build a trading dream. Build a trading business. Step by step."

## **Why This Model Works**

Most traders fail because they lack structure, discipline, and consistent feedback.

We give you all three — in a setup that's been built on the experience of 100s of successful traders.

You bring commitment.

We provide the training environment that transforms effort into results.

TheFloor is where traders are made.

And businesses are built — one trade at a time.

# Trading Without Risk

How Simulated Accounts Let You Learn, Practice & Get Funded Without Losing Your Own Money

One of the biggest reasons people never become successful traders is fear of loss.

They've seen others blow up their savings.

**They've been told trading is risky.**

They believe they can't afford to fail.

At TheFloor, we eliminate that fear completely.

How?

By training you in a simulated funded environment that mirrors real markets — where you trade as if it's live, but without risking a single rupee of your own capital.

## What Is a Simulated Funded Account?

It's a powerful practice environment provided by real prop firms, like Apex Trader Funding or FFN, where you trade with demo capital (like \$50,000 or \$100,000) under real market conditions.

You must:

Follow risk rules

Meet profit targets

Stay disciplined

If you pass this evaluation, the prop firm can offer you real funding and start paying you real profits from your performance — all without you putting your own money on the line.

## Why This Model Works So Well

- ✓ No capital risk while learning
- ✓ Trades are taken with real-time data
- ✓ You're trained to think like a funded trader
- ✓ Mistakes don't cost money — they become lessons
- ✓ Performance becomes predictable before funding

This is not paper trading. This is professional-grade practice with real structure, pressure, and feedback — the exact environment needed to build a consistently funded trader.

"Before you can earn like a pro, you must train like one. Simulated funding lets you do exactly that — without the downside."

At TheFloor, You Learn in a Risk-Free Yet Realistic Setup

Whether you're a beginner or a struggling trader, we place you in the same structured environment used by funded traders globally — with no emotional pressure of loss.

You gain confidence, control, and consistency — long before real money is ever involved.  
No fear. No damage. Just pure growth.

# Building Discipline with Practice

Because Trading Success Has Nothing to Do with Luck

— And Everything to Do with Behavior

“Trading is not about being right. It’s about  
managing your behavior.”

— Mark Douglas, Author of Trading in the Zone

The most powerful trading strategy in the world will  
fail...

If the trader using it lacks discipline.

That’s why at TheFloor, our primary goal is not to  
turn you into a strategy expert — it’s to turn you into  
a disciplined executor.

We believe, like Mark Douglas taught, that consistency in trading is a psychological game, not just a technical one.

### **Why Most Traders Fail**

They break rules under pressure  
They overtrade after a loss  
They let emotions override plans  
They focus on results instead of process  
The truth is: Lack of discipline, not lack of knowledge,  
destroys most accounts.

### **Our Method: Practice Until It's Boring**

At TheFloor, we don't give you 100 indicators or 50 setups.  
We give you a small set of powerful patterns – and train you to execute them with robotic consistency.

### **You'll learn to:**

Follow one setup at a time  
Use checklists before every trade  
Take losses with control  
Stop trading when risk limits are hit  
Journal your performance daily  
Receive real feedback from supervisors  
This process is repeated daily, over weeks – until discipline becomes second nature.

"Amateurs get excited about wins. Professionals get excited about following their plan."

### **Discipline = Income**

Discipline is the only real edge in trading.  
And unlike luck, it can be trained.  
At TheFloor, we help you master the one skill that separates real traders from dreamers: emotional control under real-time pressure.  
No shortcuts.  
No hacks.  
Just focused, daily practice – with supervision – until it clicks.  
We don't teach trading fantasies.  
We teach trading behavior.

# Trade Types: Elephant Candle & Others

## The Power of Clean Price Action & Momentum-Based Setups

At TheFloor, we don't teach dozens of strategies. We focus on a few powerful trade types — patterns that repeat every day, across every market, and are used by legendary traders like Oliver Velez.

These setups are clean, visual, momentum-driven, and easy to execute with confidence and discipline.

"Trading should be boring, repetitive, and precise — like a business."

— **Oliver Velez**

## The Elephant Candle

Also called the "Igniting Bar," this is the foundation of momentum trading. A large, wide-range candle that breaks structure with volume. Shows aggressive participation by institutions or strong directional intent. Entry is taken on pullback or break of high (or low). Works well on intraday and swing timeframes.

Used for:

- Identifying the beginning of strong moves
- Spotting reversals or continuation from key levels

### **Color Change Candle (Location-Based Reversal)**

A candle that changes from red to green (or green to red) at a significant zone  
Confirmation of buyer/seller dominance shift  
Ideal at support/resistance or demand/supply zones  
Often combined with volume spikes or Elephant structure

Used for:

- Catching early reversals
- Managing risk tightly with high R:R potential

### **Hammer / Inverted Hammer Candles**

Single-bar patterns signaling rejection from a price level.  
Typically occur at the end of a downtrend (Hammer) or uptrend (Inverted Hammer)  
Strong signal when followed by confirmation candles.

Used for:

- Spotting exhaustion
- Triggering entries with tight stop-loss

### **Gap Fills & Range Breakouts**

Price often moves to fill gaps or break tight consolidation ranges  
Combining elephant candles with breakout zones creates high-probability entries

### **Why These Patterns Work**

They're visual and repeatable

They don't require indicators

They create structure and routine

They're ideal for both funded challenges and live trading  
At TheFloor, we train you to spot, plan, and execute these setups under supervision — until it becomes second nature.

"A few simple patterns. One rule-based system. A business that pays."

# Step-by-Step: From Practice to Payout

## Your Roadmap to Becoming a Funded Trader — One Step at a Time

Most traders fail because they jump in without structure.

At TheFloor, we follow a clear, proven journey that takes you from raw practice to real, funded payouts — with no guesswork.

“We don’t rush results. We build consistency.”

### Step 1: Get Set Up for Practice

You begin in a high-performance trading simulator. Exact conditions of funded accounts: real-time data, real risk rules. We introduce you to trade types, journaling, and review habits.

✅ Outcome: You’re in a zero-risk environment, learning how real trading works.

## **Step 2: Learn the System & Trade Types**

We teach you clean, powerful setups like Elephant Candles, Color Changes, Hammers, and Breakouts. You learn our rule-based execution model and how to follow risk-to-reward principles

- ✓ Outcome: You stop guessing and start executing with structure.

## **Step 3: Supervised Practice Begins**

You trade daily, follow routines, submit journals, and receive weekly performance audits.

Mistakes are corrected through real-time reviews.

- ✓ Outcome: You become emotionally stable, disciplined, and accountable.

## **Step 4: Challenge-Ready Performance**

- Once consistent, you're guided on how to apply for a prop firm evaluation account
  - Firms like Apex, FFN, or MFF test your performance under real rules
- We help you with entries, exits, risk parameters, and passing mindset

- ✓ Outcome: You clear the challenge and qualify for real funding.

## **Step 5: Funded & Paid**

- You begin trading a live funded account provided by the prop firm
- Monthly payouts begin based on your profits (often 80–90% share)
- You continue practicing while scaling your capital and income

- ✓ Outcome: You have a remote trading business, earning monthly in dollars.

We've Built the System. You Just Follow the Path. No noise. No luck. Just discipline, steps, and smart execution — with support at every stage.

"TheFloor isn't about hype. It's about habit. Show up, follow the process, and get paid."

# The Daily Trading Routine

At TheFloor, we follow a minimalist, structured approach designed to help you become a funded trader as efficiently as possible. Your success doesn't depend on how many trades you take, but on how well you follow the plan. Discipline and repetition form the backbone of this routine.

Your Trading Day Begins at 11:30 AM IST

This marks the opening of the London session — one of the most active and volatile periods in the forex and futures markets. From this point, your only objective is to identify if the market presents your specific trade setups. If it does, you act. If it doesn't, you wait.

Patience is key.

Trade Only When the Setup Appears

There is no force or urgency to be in a trade.

You follow the plan with complete detachment. Every trade you take must fit within the rules you have practiced:

Defined setup

Defined risk per trade

Defined maximum risk per day

Once your daily risk is hit, you stop. There is no deviation. The day is done.

No Position Is Also a Position

Not trading is a powerful decision. If the market does not align with your system, you stay out. Avoid impulsive trades. Your edge lies in consistency, not activity.

Practice Builds Discipline

You will repeat this process every day. Over time, the repetition will train your mind to stay calm, follow the plan, and avoid emotional decisions. You will also use your free time wisely — reviewing trades, reading, watching recorded sessions, and revisiting your system until it becomes second nature.

This is how you build muscle memory. This is how you earn your funded account.

Welcome to TheFloor — where discipline meets opportunity.

Welcome to your trading desk.  
Let the markets come to you.

# Why You Need a Supervisor

Because No One Masters Trading Alone

Ask any consistently funded trader how they made it –  
and you'll hear the same answer:

"I had someone watching my trades."

At TheFloor, we don't just give you strategies and  
routines.

We give you a supervisor – someone who holds you  
accountable, spots your blind spots, and corrects your  
behavior before it becomes a costly habit.

"You can't see your own mistakes in real time. That's  
why mentorship matters."

## **Self-Trading vs. Supervised Trading**

### **Self-Trading:**

- Emotion-driven decisions
- Mistakes go unchecked
- Risk rules often ignored
- Motivation fades quickly
- Growth is slow and scattered

### **Supervised Trading at TheFloor:**

- Rules enforced with discipline
- Mistakes corrected in real-time
- Risk management becomes habit
- You're held accountable daily
- You grow faster, with focus

### **What Your Supervisor Does**

- Reviews your daily trades
- Tracks your emotional triggers
- Keeps you aligned with your trading plan
- Provides weekly audits and corrections
- Pushes you to stick to one method

This is not hand-holding.  
This is professional-level accountability.

**"CEOs have advisors. Athletes have coaches.**

**Why should traders go it alone?"**

**TheFloor gives you more than a system —  
we give you someone who ensures you follow it.**

**Growth doesn't happen in silence.**

**It happens with feedback, structure, and supervision**

**—**

**one trade at a time.**

# What Are Prop Firms?

Your Gateway to Capital Without the Risk

Prop Firms, short for Proprietary Trading Firms, are companies that allow skilled traders to trade the firm's capital – not their own.

Instead of risking your own savings, you get access to a simulated account with a real-world challenge. Once you pass the firm's rules and targets, they provide you with a live funded account where profits are shared – often 80% to you.

## In short:

You bring the skill.  
They bring the capital.  
You both share the profits.

## How Prop Firms Work

### Evaluation Phase

- You trade a simulated account (e.g., \$50,000 or \$100,000)
  - Meet the profit target (e.g., 8%)
  - Follow rules (daily loss, max drawdown, etc.)

### Funded Phase

- Once passed, you're funded with real capital
  - You trade under set guidelines
- Earn monthly payouts (often 80–90% of your profits)

### Scaling & Bonuses

- Many firms offer scaling plans, where your account size grows
- Traders who stay consistent get bigger accounts and bonus payouts

## **Global Firms We Align With at TheFloor**

- Apex Trader Funding
- FFN (Funded Futures Network)
  - Take Profit Trader
  - My Funded Futures
  - ...and more

These are U.S.-based, UAE and internationally trusted firms that pay out thousands of traders weekly – all tracked and verified.

## **Why Prop Firms Exist**

- They want skilled traders without hiring full-time employees
- They only risk money on proven, rule-following traders
- It's a win-win: They grow their pool, and you earn without capital stress

## **Key Benefits of Trading with Prop Firms**

- No personal capital at risk
  - Opportunity to trade larger accounts than you could afford
    - Get paid in dollars – globally scalable income
    - Learn professional risk management
    - Build a long-term trading career from home
- TheFloor helps you train, qualify, and perform under these firms – just like a funded professional.  
This is how modern trading careers begin.  
Not with savings. But with skill.

# How They Make Money

The Win-Win Business Model Behind Prop Firms

One of the most common questions is:

“If prop firms give capital to traders, how do they make money?”

The answer is simple – and smart.

Prop firms operate on a performance-based model where they only invest in profitable, disciplined traders, and everyone benefits.

You win, they win. You lose, they lose nothing.

## The Business Model Explained

1. Evaluation Fees (Their Main Revenue Stream)

Traders pay a small fee to attempt the evaluation (e.g., \$50–\$150)

This covers platform costs, admin, tech, and risk buffer  
Most traders fail the challenge – but serious ones keep trying and improving

✓ This ensures the firm is always cash-positive and sustainable.

## **Profit Sharing (When You Pass)**

Once you pass, the firm gives you a live funded account

You keep 80–90% of profits

They keep 10–20% as their share

- ✓ Now they only invest in proven traders with discipline

## **Scaling Programs**

If you perform well, firms grow your account size

Bigger traders = bigger profits

- ✓ Firms benefit more when you grow — so they support your success

## **Why It's Sustainable and Smart**

Firms never lose their own money unless you've already proven your edge

They only fund traders who follow strict rules

They make money from serious learners — not gamblers

It's one of the few businesses where success is shared, not sold

"You are the trader. They are the backers.

Your growth is in their best interest."

## **At TheFloor, We Train You to Be the Trader They Want We help you:**

Understand and follow prop firm rules

Trade like a business, not a hobby

Become the kind of trader prop firms love to fund

You don't need to guess.

The system is clear.

You win. They win. It's that simple.

# Our Partner Firms

Trusted Global Firms That Power Your Trading Career  
At TheFloor, we don't just train you –  
we connect you with real opportunities to get funded  
and earn.

That's why we've handpicked a set of global  
proprietary trading firms that are reliable, fast-paying,  
trader-friendly, and respected in the international  
community.

These are the firms our traders work with – because  
they deliver.

## 1. Apex Trader Funding (USA)

One of the largest and most popular futures prop firms  
in the world.

- Fastest-growing funded program
- Massive community of successful traders
  - Up to 90% payout share
- Scalable to \$6 Million accounts
  - Weekly payouts

✓ Ideal for traders focused on futures markets (ES, NQ,  
etc.)

## 2. FFN – Funded Futures Network

A clean, transparent, and community-driven futures  
prop firm.

- Simple rules
- Weekly payout model
- Low-cost evaluations
  - Easy reset process

✓ Perfect for traders who want structure with flexibility

### 3. Take Profit Trader (TPT)

A growing U.S.-based firm offering trader-friendly rules.

- Fixed drawdown logic
- Realistic target structure
  - 80% profit share

✓ A good fit for methodical, risk-conscious traders

### 4. My Funded Futures (MFFutures)

- A solid entry point for new traders in the funded space
- Affordable challenges and quick scaling options
- Ideal for those who want to build consistency with small accounts

### Why We Work With These Firms

- Credibility: They've paid millions in withdrawals to global traders
  - Speed: Fast onboarding and reliable payout schedules
- Structure: Clean, rule-based systems that favor discipline over luck
  - Transparency: No hidden rules or surprise disqualifications
- Compatibility: They align with the trade systems we teach at TheFloor

"We don't partner with hype."

We partner with firms that pay and play fair."

We Train You for These Exact Challenges

Every day at TheFloor, you'll practice in a simulator that matches these firms' rules.

By the time you apply, you'll already be trading like a funded professional — just in training gear.

These are not just names.

They are your future employers — if you treat trading like a business.

# Struggles of Indian Traders

Why Most Give Up Before They Get Good  
Trading has exploded in India — but so have the problems that come with doing it the wrong way. Every day, we meet traders who started with hope, but ended with losses, loans, and mental fatigue.  
“The problem isn’t trading.  
The problem is how most Indians are taught to trade.”

## **The Harsh Reality**

### **1. Trading on Borrowed Money**

Many Indian traders take loans or use credit cards hoping for quick profits.

One bad month – and they're buried in debt.

### **2. Following the Wrong Gurus**

Telegram tips, YouTube signals, indicator overload – all flash, no foundation.

No one teaches structure, rules, or real-world accountability.

### **3. Gambling, Not Trading**

Buying options on expiry day. Chasing 5-minute breakouts.

No plan. No system. No journal. Just pure hope.

### **4. Lack of Guidance**

No mentors. No audit system. No one to tell them: "Stop. You're doing it wrong."

So they burn money for months... until they give up.

### **5. Psychological Burnout**

Losses hurt, but confusion hurts more.

Most traders don't fail financially first – they fail emotionally.

## **What They Actually Need**

- A clean, structured system with 2–3 proven trade types
- A realistic trading plan with fixed risk per trade
- A simulator to practice without burning real capital
- A supervisor to guide, correct, and hold them accountable
- A business-like routine – not random trading

## **Why TheFloor Was Built**

To end this cycle.

To give Indian traders a real chance – not hype, not fantasy.

Just the same systems that work for thousands of professionals globally.

If you're tired of trading pain, confusion, and chaos...

This is where you reset.

This is where you build the right way.

# Why We Choose to Train as Funded Traders

In a world overflowing with over 10,000 courses and training programs—ranging from coding to cooking, marketing to management—why did we choose to focus our mission on training individuals to become funded traders?

Because it's life-changing.

We're not just teaching charts, candlesticks, and strategies. We're transferring a skill that rewires how you see money, risk, opportunity, and time. Becoming a funded trader is not merely about financial gain—it's about reclaiming control over your life.

Trading, when approached the right way, introduces balance. It demands discipline, clarity, and the ability to trust a process. But once mastered, it gives back tenfold. It gives you time—the one currency no one can earn back. Time with your children. Time with your partner. Time to take that vacation without seeking permission. Time to live.

Most people spend decades chasing promotions and pay raises. Our training is about building a skill where, instead of trading hours for rupees, you trade precision for freedom. Funded accounts offered by global proprietary trading firms mean you can begin your journey without risking your own capital—and still grow into managing large accounts, earning performance-based payouts.

It doesn't solve every money problem. But it teaches you how to think like someone who no longer lives at the mercy of money. It's not about getting rich quick. It's about getting free, gradually—with consistency, community, and character.

That's why we train funded traders.  
Because we're not in the business of education.  
We're in the business of transformation.

# Program Fee & Our Honest Refund Promise

**You Either Make the Most of It — or You Get Every  
Rupee Back.**

**Fee: ₹2,50,000 + GST (One-time)**

This fee gives you access to:

- ✓ Our complete trading program
- ✓ Real-market simulated capital
- ✓ Daily supervision and audit
- ✓ Support to qualify with top global prop firms
- ✓ 4-month structured program to turn you into a funded trader

## **Our Straight forward Promise**

We believe in results, not just effort.  
If you don't earn back the fee amount through our  
system during or after the 4-month training – your  
full fee, including GST, will be refunded.  
No questions asked. No paperwork. No delay.  
We're not here to trap anyone into a transaction.  
We're here to transform people into profitable  
traders.

We're so confident that if you give it your time and  
effort, it will change your trading.  
And if it doesn't – we don't want your money.  
"If you can't make the best use of it,  
we won't charge you for it.  
That's honesty. That's TheFloor."  
This isn't just a fee.

It's a trust deposit – and it's fully returned if the  
journey doesn't serve you.  
No small print. Just big trust.

# Why We Offer a Refund

In a time where most training programs are designed to lock you in and move on, we've taken a different path. We refund—because we believe in the value we provide, and we believe in you.

Our approach is straightforward: if you cannot make the best use of our structured process to become a fully funded trader within four months—if you don't earn back your fee, or if life simply didn't allow you to participate fully—then no questions asked, your money is refunded.

Why?

Because we're not here to collect fees.

We're here to build funded traders.

Your success means everything to us. And we measure our success only through yours.

We know what it takes to become consistent and confident in the markets. We've built a proven path—mechanical, repeatable, and realistic. We expect you to give it your best, and in return, we give you everything: tools, mentorship, funding, and support. If that equation doesn't result in transformation for you—financially and mentally—then what's the point?

Time is precious. These four months matter. If we cannot equip you during this time, we don't believe in holding on to your hard-earned money. You trusted us. We honour that trust.

**The refund policy is not a loophole.  
It's a statement.**

It says we are confident in what we do. And it says that we built this program for your success—not ours.

**Minimalism Is the  
Way Forward**

In trading—and in life—clarity wins.  
That's why we've built a program that's structured,  
simple, and transformative. In just 4 months, our  
process shapes you into a disciplined trader. And  
discipline is the root of all consistent profitability.

We don't overwhelm you with endless strategies,  
indicators, or market theories.

We teach you what matters:

- ✓ How to follow a mechanical system
- ✓ How to manage risk
- ✓ How to stay consistent
- ✓ How to earn funded accounts

That's it.

No fluff. No confusion. Just results.  
This is the shortest path to becoming a profitable  
trader. And that's why we stand by it fully—with a  
money-back guarantee.

If, for any reason—personal or practical—you  
couldn't benefit from our process, we refund. No  
questions asked. Because we're not here to trap  
you. We're here to transform you.

We also believe:

Learn less, but learn right.

Focused action beats scattered knowledge.

While the world keeps chasing complexity, we stay  
true to what works: minimalism, discipline, and  
structure.

That's all you need to win.

**We Make Money  
Only When You  
Do**

At TheFloor, our commitment is simple – we succeed only when you do. Our entire model is designed around your profitability. If you don't make money, we don't either.

We follow a straightforward approach:

### **Practice Over Theory**

Our training is not about tips, tricks, or market predictions. It's about helping you become a disciplined, risk-managed trader through repetition and real-time practice. You'll be trained to follow a structured system that has been tested by hundreds of traders before you.

### **Environment That Enables Success**

We provide everything you need to focus on your development – Grade-A training, high-performance IT infrastructure, and ongoing supervision to ensure you stay on track. You're not alone in the process.

### **Access to Capital Without Risk**

We partner with top-tier proprietary trading firms to give you access to simulated funded accounts. These accounts give you the opportunity to earn real profits without putting your own capital at risk – if you follow the rules and demonstrate consistency.

### **Your Investment Is Protected**

Here's our most important promise: if you don't become profitable using our system – at the very least, making back what you paid us – we refund your money. No questions asked. This isn't a course you pay for and forget. We are invested in your success.

You don't just train here. You grow here.  
**Because we make money only when you do.**

**Why Our System  
Is the Best**

At TheFloor, we don't chase trades — we build traders. Our system is designed to help you become a disciplined, consistent trader by practicing a clear process that leads to predictable outcomes. You'll learn to follow a trading plan where every trade fits within a defined structure.

#### The Four Outcomes of Every Trade

By sticking to the plan, every trade you take will fall into one of these four outcomes — each with a purpose, and none outside your control:

##### Highly Profitable

When the market aligns perfectly with your setup and execution, you hit your ideal risk-to-reward — the kind of trade that defines your edge.

##### Moderately Profitable

Even if the trade doesn't reach full target, sticking to the plan and managing the position correctly results in a smaller but positive outcome.

##### Break Even

If conditions change or momentum fades, you may exit at breakeven. That's a win too — you preserved capital and followed the process.

##### Predefined Loss

Losses are part of the plan. You know your risk in advance. And since you're trading simulated capital, even real-world losses are virtual — but profits are real. You sleep easy knowing nothing is outside the system.

This framework keeps emotions out and decisions consistent. You don't guess. You follow the system. That's why our system works — and that's why it's the best.

Practice. Discipline. Real profits. Virtual risk.

**Job Assurance at TheFloor:  
No Fixed Salary — Only  
Performance-Based  
Growth**

At TheFloor, we offer more than just a job — we offer a real opportunity to grow based on your performance.

If you train with us and reach a defined level of skill and consistency within 4 months, you will be offered a job. But here's the key difference: there is no fixed salary.

Why? Because we don't want to limit your potential.

We believe fixed salaries cap your growth. At TheFloor, your earnings are directly tied to your performance. The better you perform, the more you earn — simple. This model rewards discipline, consistency, and execution, not just attendance or effort.

If you're someone who values freedom, accountability, and uncapped earnings, this is for you. We will equip you with the tools, structure, and environment needed to perform. But the rewards?

You earn them. You own them. This is not a promise of comfort. It's a challenge to rise. And if you're ready to take that challenge, TheFloor is where your professional journey begins — not with a paycheck, but with proof of your ability.

Performance is your currency.  
Consistency is your job security.  
Your results write your offer letter.

**APEX<sup>TM</sup>  
TRADER  
FUNDING**

**Infinite Possibilities.**

Apex Trader Funding was founded in 2021 and it set out to make a better model than any company out there with the goal of payout out the most to traders. Darrell Martin founded Apex Trader Funding after trying and reviewing all the funding companies he could find he set out to build a better model, a model we would want himself as a customer. He then launched Apex Trader Funding. It has since become the leading trader funding company paying out more than any futures funding evaluation firm to its customers. It has grown into a thriving community of 10's of 1000's of members in over 150 countries. Apex Trader funding is based in Austin, Texas and are an evaluation funding company that focuses on the futures markets exclusively.
